Joseph Adewunmi

Backend Developer | Go & TypeScript | Systems, Cloud & Agentic AI
Lagos State, Nigeria

Summary

I am a backend developer who loves turning ideas into real, scalable systems. I have built platforms across healthcare, Web3, cybersecurity, and e-commerce, always with a focus on performance, clarity, and long-term impact.

I work mostly with Go, JavaScript/TypeScript, Node.js, and cloud tools like AWS and Docker.

Lately, I've been diving into AI agent development using CrewAI, LangChain, and Google ADK, bringing intelligence into the systems I build.

Currently focused on Go, AWS, and agentic systems.

Let's connect if you enjoy backend tech, AI, or just building things that matter.

Experience

RID LABS

IT Support Technician (NYSC)
August 2024 - May 2025 (10 months)
Lagos State, Nigeria

Bloombyte

Backend Developer
March 2024 - May 2024 (3 months)

Optimized Eliteplay gaming platform backend with NestJS and Redis, improving request handling by 30%.

Designed fair, scalable algorithms for Dice and Crash games, enhancing user retention.

Wrote Swagger API docs, reducing integration errors by 40%.

Integrated Elitepypers API, streamlining financial transactions with 99.9% uptime.

Enabled real-time updates via WebSockets/SSE, driving 20% more user engagement.

Partnered with frontend teams to align APIs with UI, cutting deployment cycles by 15%.

Education

Federal University of Technology Akure

Bachelor of Technology - BTech, Computer Science · (January 2018 - December 2023)
